PRINCIPAL OPERATING REGIONS

Sales representatives are based in nearly every country. We have manufacturing facilities in France, Germany, Malaysia, UK and USA, with some of these also serving as R&D centres of excellence. Our dedicated, aftermarket team provides extended global coverage to deliver the most reliable service programme anywhere – and everywhere – in the world.

CUSTOMERS

We are a trusted partner to over 100 governments and their agencies, including homeland security, customs authorities, and the military. We provide solutions and support to airports, and help protect people, buildings and infrastructure across the globe. We work alongside customers to tailor our products to their requirements and to develop new solutions to ever evolving challenges.

R&D PARTNERS

In the past ten years, Smiths Detection has invested over £500M in R&D, conducted by our highly-skilled team of engineers, chemists and scientists in conjunction with research partners, including Hitachi, Microsoft, U.S. Department of Homeland Security, US Department of Defense, UK Ministry of Defence, John Hopkins University, and Duke University.
